

WCAG 3.3.3: Error Suggestion

Accessibility Testing Documentation

SAVE PROGRESS: Use File > Save As
Replace _BLANK_ with status: _PASSED, _FAILED, etc.

Overall Requirement Status:

☐ Pass

☒ Fail

☐ In Process

☐ Needs Review

☐ Not Applicable

Requirement Description

If an input error is automatically detected and suggestions for correction are known, then the suggestions are provided.

Testing Instructions

Testing instructions not available

Step-by-Step Testing Guide

1. Assign qualified accessibility tester to this criterion
2. Use assistive technologies (screen reader, keyboard navigation)
3. Test with multiple browsers and devices if applicable
4. Document findings with detailed evidence and screenshots
5. Provide specific remediation guidance for any violations
6. Mark with confidence level and comprehensive notes

Common Violations & Examples

- Review WCAG documentation for specific violation examples
- Test with assistive technologies to identify issues
- Consult accessibility guidelines for detailed examples

Acceptance Criteria

Acceptance criteria not available

Success Indicators:

- All non-text content has appropriate text alternatives
- Text alternatives serve equivalent purpose
- Decorative content is properly marked
- Assistive technology can access alternatives

Common Failure Examples

Common failure examples not available

Common Failure Patterns:

- **Missing alt attributes:** Images without any alternative text
- **Generic alt text:** "image", "photo", "picture" without context
- **Decorative images:** Not marked as decorative or with empty alt
- **Complex images:** Charts, graphs without proper descriptions
- **Functional images:** Buttons, links without descriptive alt text

VM652:3 =====
VM652:6 • Clearing previous test variables...
VM652:10 • Variables cleared successfully

Testing Checklist

- ☒ Review requirement details and understand acceptance criteria
- ☒ Test each page listed above using the specified test method
- ☒ Document findings and evidence for each test instance
- ☒ Update status in testing platform with results and notes
- ☒ Review and validate findings before marking as complete

General Testing Notes

Manual verification of forms identified non-helpful error messages when impersonating another role in read-only mode (Test Instances 4 and 5). Attempting to add/edit/delete gives an error indicating a possible authentication issue and suggests that the user log in again. However, this behavior is expected to fail as we're in a read-only mode and does not involve an authentication issue.
